### Dynamic Brands Summary

Powered by the 200 brands contained in the Alpha Brands Consumer Spending Index

A "best of the best" portfolio (25-50 stocks)

A CORE Large Cap equity allocation Typical weight of each position: 3-5%

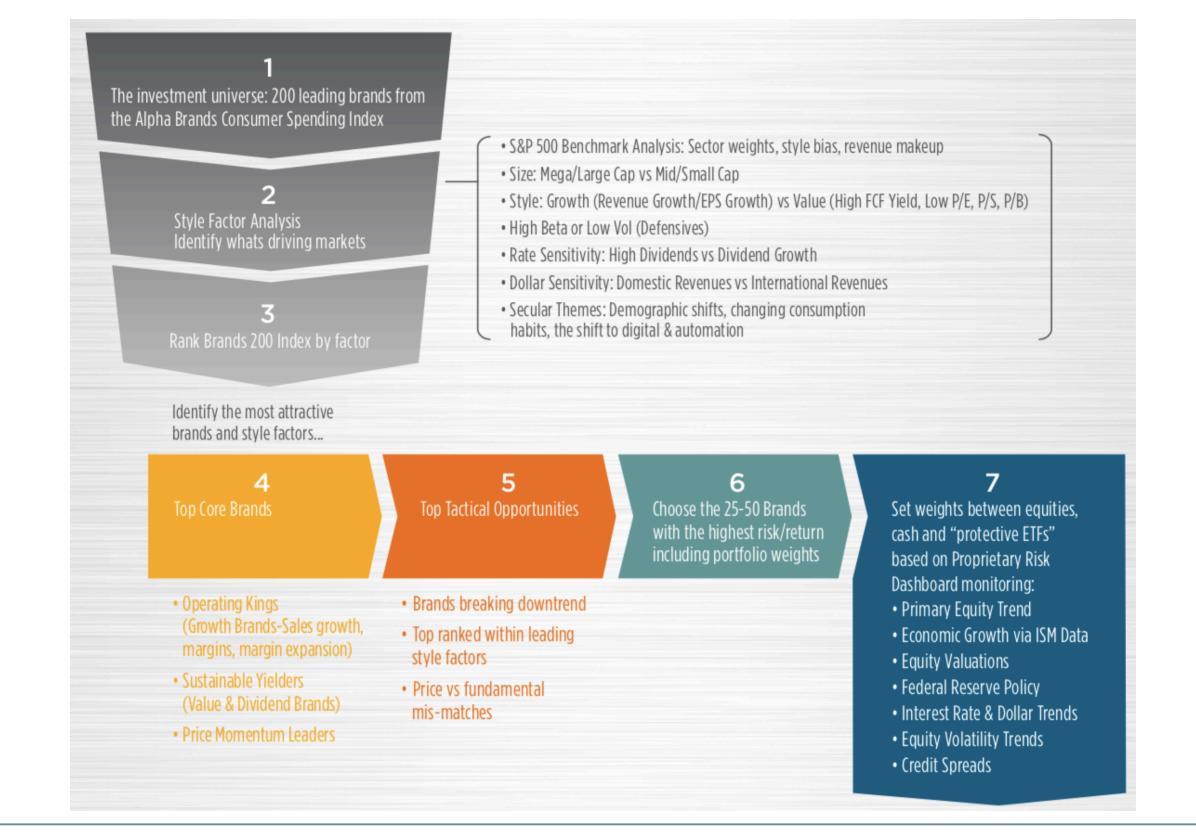

Agnostic to value and growth Dynamic, risk management (can hold up to 40% cash when prudent)

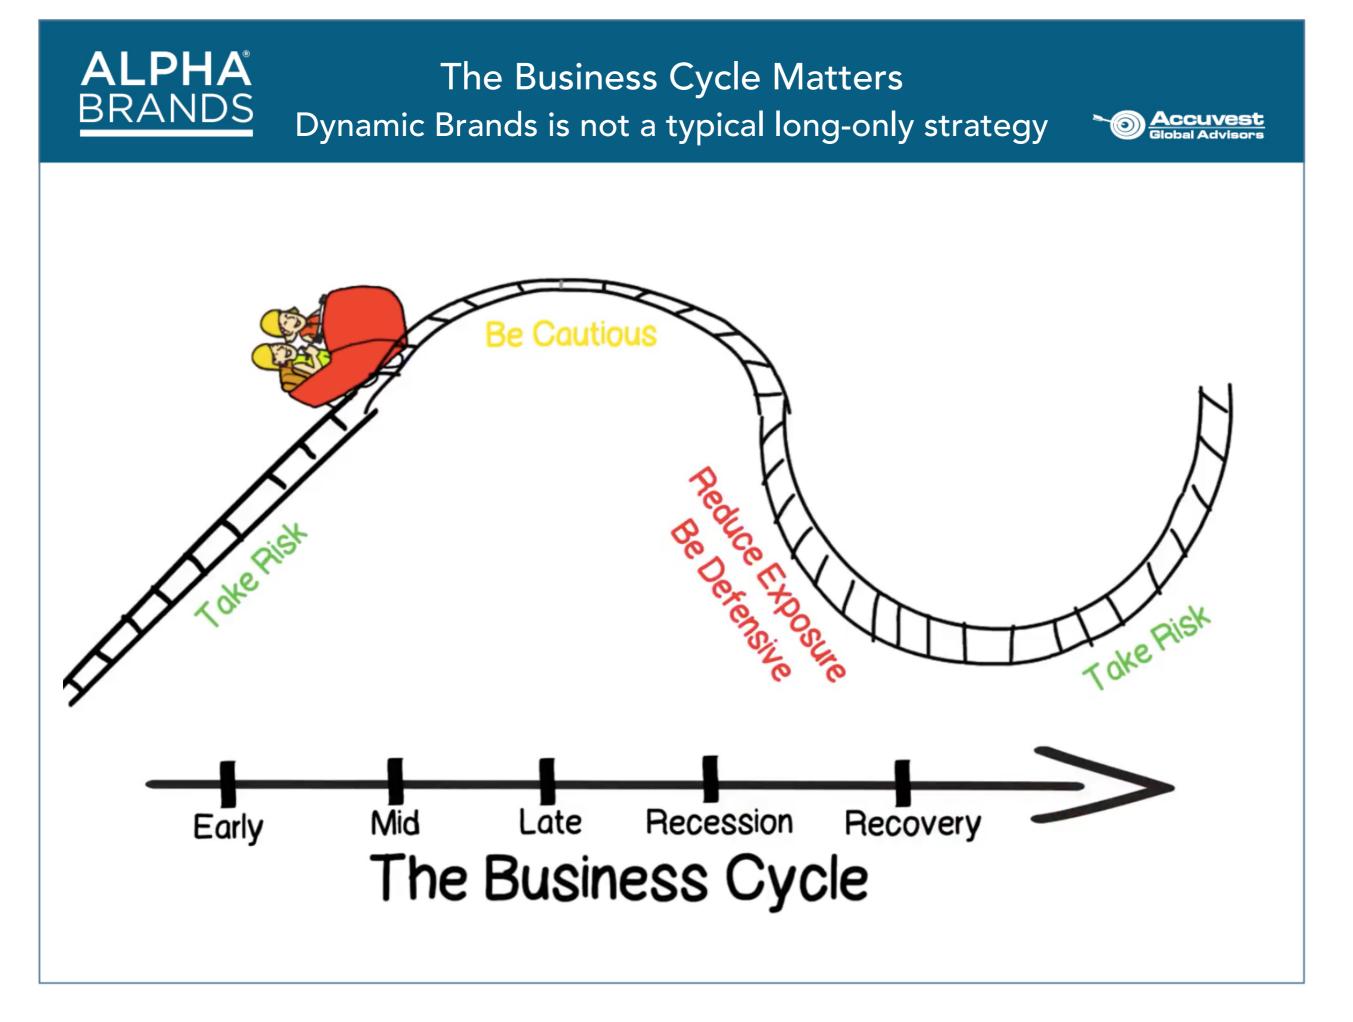

Unconstrained and opportunistic across sectors and industries Can deploy defensive and protective ETF's in times of high market stress

A Core + Tactical stock selection process Managed with a tax-aware approach

#### **Dynamic Brands Process**

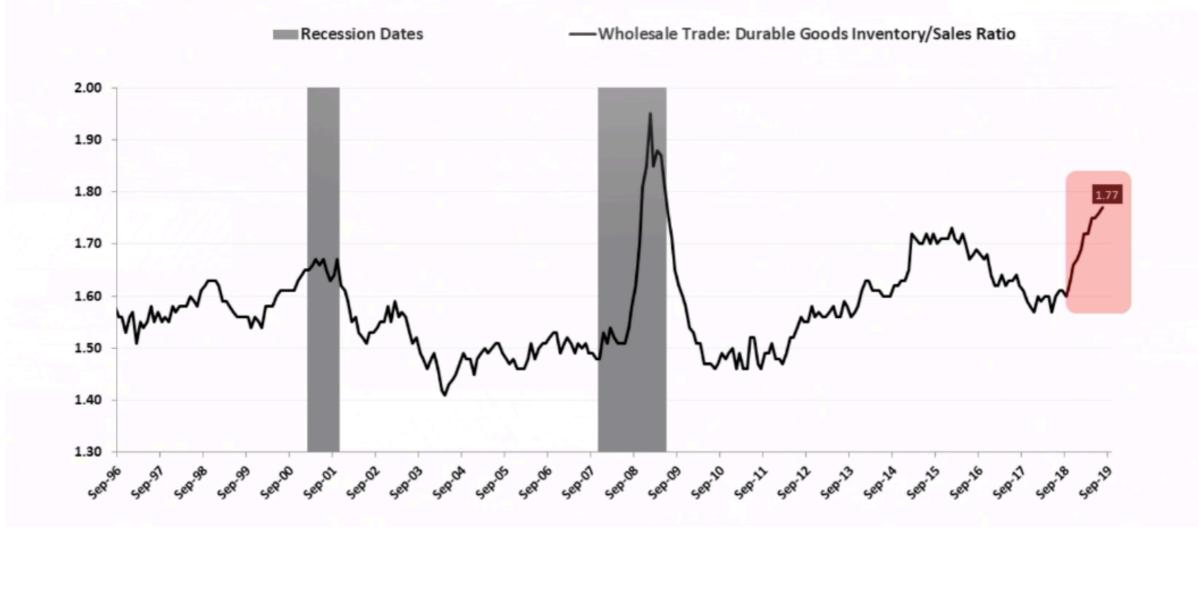

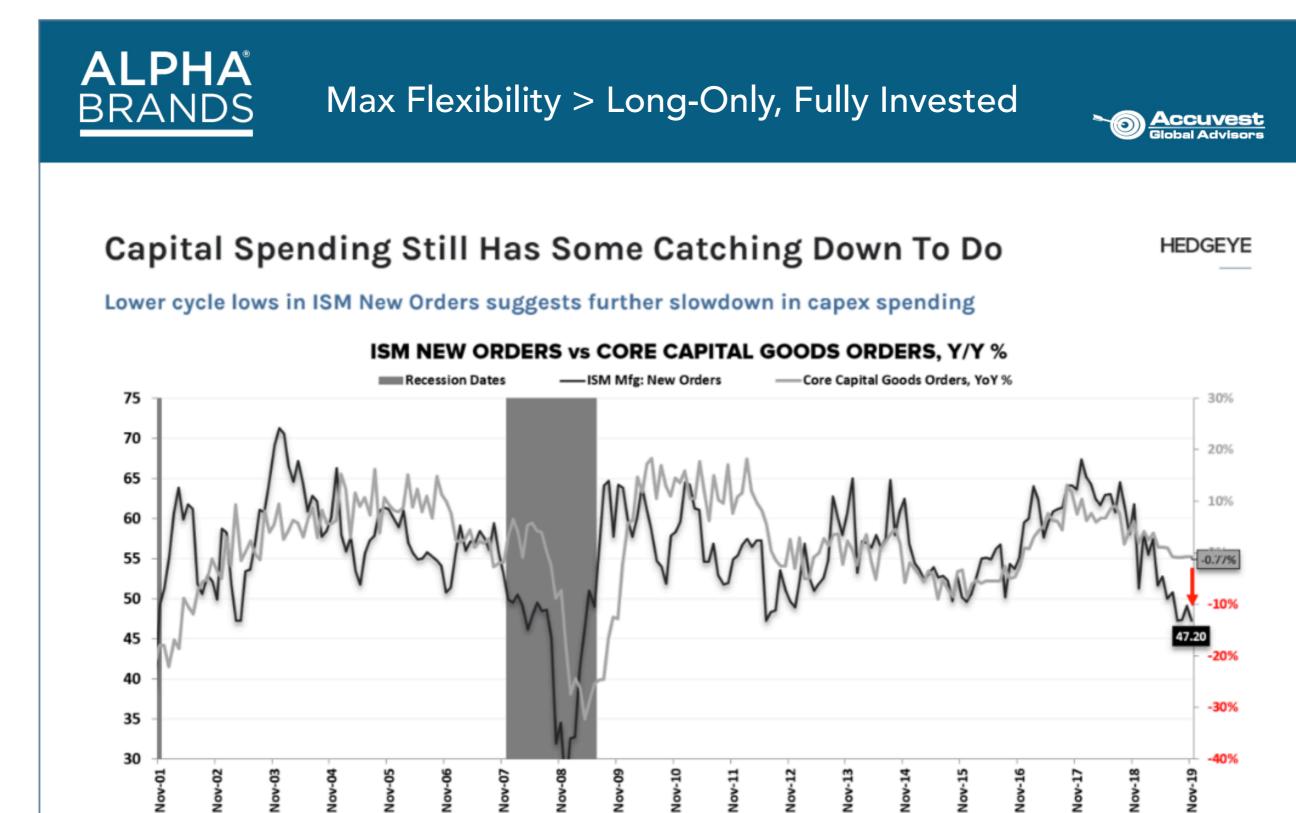

### With Demand Slowing... Inventories At Cycle Highs

HEDGEYE

What started as inventory hoarding ahead of impending tariff implementation snowballed as synchronized global deceleration gained traction and demand destruction followed. Bloated inventories remain both margin negative (discounting) and output negative (reduced demand).

#### Alpha Brands Consumer Spending Index Disclosure

The Alpha Brands Consumer Spending Index<sup>TM</sup> is presented by Accuvest and is powered by the Alpha Brands Investment Committee. The Index includes the top ranked brands (200 maximum), on an equal-weighted basis, from a static number of consumer-facing sub-industries chosen by the Alpha Brands Investment Committee. The 60+ sub-industries includes those deemed vital to the consumption supply-chain. Index constituents are the highest ranked companies in their respective subindustries based on a proprietary ranking system that combines market cap, total sales, and sales growth. The Alpha Brands Consumer Spending Index<sup>TM</sup> allows all constituents to free-float during each calendar year. The Index is re-constituted in December of every calendar year and will maintain a target of 200 leading brands going forward. The Index Committee identified a target number of sub-industries & constituents to track for the Index back-test. This approach was static over the back-tested time period for the sake of consistency. The Index offers a real-time view into consumer spending patterns on a yearly basis via the leading brands in our targeted sub-industries. The Index does not represent an investment and it is not possible to invest directly in an Index. Accuvest makes no representations regarding the advisability of investing in investment products based on the Index the performance of the Index. The imposition of these fees and charges would cause actual performance of the securities/vehicles to be lower than the Index advice.
